Volume 36 (2003)

**Volume 36 Number 1**

| | | |
|---|---|---|
| N.A.T. Brown and J.L. Jensen | 1 | **The development of contact force construction in the dynamic-contact task of cycling** |
| X. Zhang and J. Xiong | 9 | **Model-guided derivation of lumbar vertebral kinematics in vivo reveals the difference between external marker-defined and internal segmental rotations** |
| T.L. Haut Donahue, M.L. Hull, M.M. Rashid and C.R. Jacobs | 19 | **How the stiffness of meniscal attachments and meniscal material properties affect tibio-femoral contact pressure computed using a validated finite element model of the human knee joint** |
| S.W. Donahue, H.J. Donahue and C.R. Jacobs | 35 | **Osteoblastic cells have refractory periods for fluid-flow-induced intracellular calcium oscillations for short bouts of flow and display multiple low-magnitude oscillations during long-term flow** |
| G. Wang, X. Deng and R. Guidoin | 45 | **Concentration polarization of macromolecules in canine carotid arteries and its implication for the localization of atherogenesis** |
| T. Yanai | 53 | **Stroke frequency in front crawl: its mechanical link to the fluid forces required in non-propulsive directions** |
| A. Schweizer, O. Frank, P.E. Ochsner and H.A.C. Jacob | 63 | **Friction between human finger flexor tendons and pulleys at high loads** |
| S.M. Tanaka, J. Li, R.L. Duncan, H. Yokota, D.B. Burr and C.H. Turner | 73 | **Effects of broad frequency vibration on cultured osteoblasts** |
| D. Rosenbaum, E. Eils and A. Hillmann | 81 | **Changes in talocrural joint contact stress characteristics after simulated rotationplasty** |
| M. LaFiandra, R.C. Wagenaar, K.G. Holt and J.P. Obusek | 87 | **How do load carriage and walking speed influence trunk coordination and stride parameters?** |
| J.H-C. Wang, F. Jia, T.W. Gilbert and S.L-Y. Woo | 97 | **Cell orientation determines the alignment of cell-produced collagenous matrix** |
| J. De Hart, G.W.M. Peters, P.J.G. Schreurs and F.P.T. Baaijens | 103 | **A three-dimensional computational analysis of fluid–structure interaction in the aortic valve** |
| *Technical notes* | | |
| D.E. Hurwitz, K.C. Foucher and T.P. Andriacchi | 113 | **A new parametric approach for modeling hip forces during gait** |
| D. Vashishth, K.E. Tanner and W. Bonfield | 121 | **Experimental validation of a microcracking-based toughening mechanism for cortical bone** |
| J.D. Feikes, J.J. O'Connor and A.B. Zavatsky | 125 | **A constraint-based approach to modelling the mobility of the human knee joint** |

D.P. Pioletti, J. Müller, L.R. Rakotomanana, J. Corbeil and E. Wild — 131 **Effect of micromechanical stimulations on osteoblasts: development of a device simulating the mechanical situation at the bone–implant interface**

*Short communications*

B.H. Campbell, W.W. Clark and J.H-C. Wang — 137 **A multi-station culture force monitor system to study cellular contractility**

S. LaScalza, J. Arico and R. Hughes — 141 **Effect of metal and sampling rate on accuracy of Flock of Birds electromagnetic tracking system**

145 **Letter to the Editor**

147 **Book reviews**

151 **Erratum**

153 **Announcement**

**Volume 36 Number 2**

T.O. McKinley and B.K. Bay — 155 **Trabecular bone strain changes associated with subchondral stiffening of the proximal tibia**

C.A.J. Schulze-Bauer and G.A. Holzapfel — 165 **Determination of constitutive equations for human arteries from clinical data**

S.J. Ferguson, J.T. Bryant, R. Ganz and K. Ito — 171 **An in vitro investigation of the acetabular labral seal in hip joint mechanics**

C. Fleck and D. Eifler — 179 **Deformation behaviour and damage accumulation of cortical bone specimens from the equine tibia under cyclic loading**

C.L. Malik, S.M. Stover, R.B. Martin and J.C. Gibeling — 191 **Equine cortical bone exhibits rising R-curve fracture mechanics**

Y.Y. Dhaher, A.D. Tsoumanis and W.Z. Rymer — 199 **Reflex muscle contractions can be elicited by valgus positional perturbations of the human knee**

E.J. Perreault, C.J. Heckman and T.G. Sandercock — 211 **Hill muscle model errors during movement are greatest within the physiologically relevant range of motor unit firing rates**

D.P. Beason, G.J. Dakin, R.R. Lopez, J.E. Alonso, F.A. Bandak and A.W. Eberhardt — 219 **Bone mineral density correlates with fracture load in experimental side impacts of the pelvis**

B. Kahler, M.V. Swain and A. Moule — 229 **Fracture-toughening mechanisms responsible for differences in work to fracture of hydrated and dehydrated dentine**

L.A. Rozendaal, H.E.J. Veeger and L.H.V. van der Woude — 239 **The push force pattern in manual wheelchair propulsion as a balance between cost and effect**

W.J. Wang, R.H. Crompton, Y. Li and M.M. Gunther — 249 **Optimum ratio of upper to lower limb lengths in hand-carrying of a load under the assumption of frequency coordination**

*Short communications*

A.D. Moss, N.E. Fowler and V.L. Tolfrey — 253 **A telemetry-based velocometer to measure wheelchair velocity**

A.M.T. Choo and T.R. Oxland 259 Improved RSA accuracy with DLT and balanced calibration marker distributions with an assessment of initial-calibration

F.J. Valero-Cuevas, N. Smaby, M. Venkadesan, M. Peterson and T. Wright 265 The strength–dexterity test as a measure of dynamic pinch performance

B.T. Peters, J.M. Haddad, B.C. Heiderscheit, R.E.A. Van Emmerik and J. Hamill 271 Limitations in the use and interpretation of continuous relative phase

J.K. Leader, J.R. Boston, R.E. Debski and T.E. Rudy 275 Mandibular kinematics represented by a non-orthogonal floating axis joint coordinate system

K.R. Kaufman, T. Wavering, D. Morrow, J. Davis and R.L. Lieber 283 Performance characteristics of a pressure microsensor

D.C. Wirtz, T. Pandorf, F. Portheine, K. Radermacher, N. Schiffers, A. Prescher, D. Weichert and F.U. Niethard 289 Concept and development of an orthotropic FE model of the proximal femur

C. Zhao, P.C. Amadio, L. Berglund, M.E. Zobitz and K.-N. An 295 A new testing device for measuring gliding resistance and work of flexion in a digit

300 Letter to the editor

303 Author's response

305 Letter to the editor

307 Book review

309 Erratum

311 Announcement

**Volume 36 Number 3**

M.J. Hiley and M.R. Yeadon 313 The margin for error when releasing the high bar for dismounts

D.G. Thelen, F.C. Anderson and S.L. Delp 321 Generating dynamic simulations of movement using computed muscle control

J.R. Fernández, M. Gallas, M. Burguera and J.M. Viaño 329 A three-dimensional numerical simulation of mandible fracture reduction with screwed miniplates

C.C.-B. Wang, N.O. Chahine, C.T. Hung and G.A. Ateshian 339 Optical determination of anisotropic material properties of bovine articular cartilage in compression

B. Baccani, F. Domenichini and G. Pedrizzetti 355 Model and influence of mitral valve opening during the left ventricular filling

F. Corazza, J.J. O'Connor, A. Leardini and V.P. Castelli 363 Ligament fibre recruitment and forces for the anterior drawer test at the human ankle joint

H. Azuma, K. Yasuda, H. Tohyama, T. Sakai, T. Majima, Y. Aoki and A. Minami 373 Timing of administration of transforming growth factor-beta and epidermal growth factor influences the effect on material properties of the in situ frozen-thawed anterior cruciate ligament

J.Z. Wu, R.G. Dong, W.P. Smutz and A.W. Schopper 383 Modeling of time-dependent force response of fingertip to dynamic loading

L. Nolan and D.C. Kerrigan 393 Keep on your toes: gait initiation from toe-standing

P.E. di Prampero and M.V. Narici 403 Muscles in microgravity: from fibres to human motion

K.M. DeGoede and J.A. Ashton-Miller 413 Biomechanical simulations of forward fall arrests: effects of upper extremity arrest strategy, gender and aging-related declines in muscle strength

P. W. Longest and C. Kleinstreuer 421 Comparison of blood particle deposition models for non-parallel flow domains

I. Ohnishi, K. Oikawa, K. Tsuji, T. Ichikawa and T. Kurokawa 431 A femoral neck fracture model in rabbits

*Short communications*

M. Fortin, M.D. Buschmann, M.J. Bertrand, F.S. Foster and J. Ophir 443 Dynamic measurement of internal solid displacement in articular cartilage using ultrasound backscatter

A. Erdemir, A.J. Hamel, S.J. Piazza and N.A. Sharkey 449 Fiberoptic measurement of tendon forces is influenced by skin movement artifact

B.A. Kyckelhahn, P.B. Nason, J.G. Tidball and A.M. Boriek 457 Kinematic modeling of single muscle fiber during diaphragm shortening

463 Announcement

**Volume 36 Number 4**

K.G. Holt, R.C. Wagenaar, M.E. LaFiandra, M. Kubo and J.P. Obusek 465 Increased musculoskeletal stiffness during load carriage at increasing walking speeds maintains constant vertical excursion of the body center of mass

G.P. Siegmund, D.J. Sanderson, B.S. Myers and J.T. Inglis 473 Rapid neck muscle adaptation alters the head kinematics of aware and unaware subjects undergoing multiple whiplash-like perturbations

N. Juncosa, J.R. West, M.T. Galloway, G.P. Boivin and D.L. Butler 483 In vivo forces used to develop design parameters for tissue engineered implants for rabbit patellar tendon repair

A. Race, M.A. Miller, D.C. Ayers and K.A. Mann 489 Early cement damage around a femoral stem is concentrated at the cement/bone interface

D.L. Jindrich, Y. Zhou, T. Becker and J.T. Dennerlein 497 Non-linear viscoelastic models predict fingertip pulp force-displacement characteristics during voluntary tapping

J. Davis, K.R. Kaufman and R.L. Lieber 505 Correlation between active and passive isometric force and intramuscular pressure in the isolated rabbit tibialis anterior muscle

C.L. Vaughan 513 Theories of bipedal walking: an odyssey

M.S. Moayeri and G.R. Zendehbudi 525 Effects of elastic property of the wall on flow characteristics through arterial stenoses

I.J. Udofia and Z.M. Jin 537 Elastohydrodynamic lubrication analysis of metal-on-metal hip-resurfacing prostheses

M.R. Yeadon and M.A. Brewin 545 Optimised performance of the backward longswing on rings

A.L. Clark, L.D. Barclay, J.R. Matyas and W. Herzog 553 In situ chondrocyte deformation with physiological compression of the feline patellofemoral joint

B.M. Nigg, D. Stefanyshyn, G. Cole, P. Stergiou and J. Miller — 569 **The effect of material characteristics of shoe soles on muscle activation and energy aspects during running**

M.E. Nadzadi, D.R. Pedersen, H.J. Yack, J.J. Callaghan and T.D. Brown — 577 **Kinematics, kinetics, and finite element analysis of commonplace maneuvers at risk for total hip dislocation**

*Short Communications*

W.Y. Gu, H. Yao, C.Y. Huang and H.S. Cheung — 593 **New insight into deformation-dependent hydraulic permeability of gels and cartilage, and dynamic behavior of agarose gels in confined compression**

K.C. Moisio, D.R. Sumner, S. Shott and D.E. Hurwitz — 599 **Normalization of joint moments during gait: a comparison of two techniques**

B.E. Koop and J.L. Lewis — 605 **A model of fracture testing of soft viscoelastic tissues**

B.J. Fregly and W.G. Sawyer — 609 **Estimation of discretization errors in contact pressure measurements**

615 **Letter to the Editor**

617 **Author's response**

*Erratum*

N.A.T. Brown and J.L. Jensen — 619 **Erratum to "The development of contact force construction in the dynamic-contact task of cycling" [Journal of Biomechanics 36 (2003) 1–8]**

I **Announcement**

**Volume 36 Number 5**

**SPECIAL ISSUE**

Cardiovascular Biomechanics

*Editorial*

N. Westerhof — 621 **Special issue on mechanics of the cardiovascular system**

M.F. O'Rourke — 623 **Vascular mechanics in the clinic**

S. Lehoux and A. Tedgui — 631 **Cellular mechanics and gene expression in blood vessels**

C.M. Spofford and W.M. Chilian — 645 **Mechanotransduction via the elastin–laminin receptor (ELR) in resistance arteries**

P. Sipkema, P.J.W. van der Linden, N. Westerhof and F.C.P. Yin — 653 **Effect of cyclic axial stretch of rat arteries on endothelial cytoskeletal morphology and vascular reactivity**

A. Rachev and S.E. Greenwald — 661 **Residual strains in conduit arteries**

P. Fridez, M. Zulliger, F. Bobard, G. Montorzi, H. Miyazaki, K. Hayashi and N. Stergiopulos — 671 **Geometrical, functional, and histomorphometric adaptation of rat carotid artery in induced hypertension**

J.J. Wentzel, F.J.H. Gijsen, N. Stergiopulos, P.W. Serruys, C.J. Slager and R. Krams — 681 **Shear stress, vascular remodeling and neointimal formation**

H. Zhu, J.J. Warner, T.R. Gehrig and M.H. Friedman 689 **Comparison of coronary artery dynamics pre- and post-stenting**

J. De Hart, F.P.T. Baaijens, G.W.M. Peters and P.J.G. Schreurs 699 **A computational fluid-structure interaction analysis of a fiber-reinforced stentless aortic valve**

H. Suga 713 **Global cardiac function: mechano-energetico-informatics**

P.P. de Tombe 721 **Cardiac myofilaments: mechanics and regulation**

P.K. Zysset 1469 **A review of morphology–elasticity relationships in human trabecular bone: theories and experiments**

J.D. Currey 1487 **The many adaptations of bone**

E.R.C. Draper and A.E. Goodship 1497 **A novel technique for four-point bending of small bone samples with semi-automatic analysis**

S. Hengsberger, J. Enstroem, F. Peyrin and Ph. Zysset 1503 **How is the indentation modulus of bone tissue related to its macroscopic elastic response? A validation study**

N. Götzen, A.R. Cross, P.G. Ifju and A.J. Rapoff 1511 **Understanding stress concentration about a nutrient foramen**

R. Vanderby Jr. and P.P. Provenzano 1523 **Collagen in connective tissue: from tendon to bone**

F.H. Silver, J.W. Freeman and G.P. Seehra 1529 **Collagen self-assembly and the development of tendon mechanical properties**

A. Redaelli, S. Vesentini, M. Soncini, P. Vena, S. Mantero and F.M. Montevecchi 1555 **Possible role of decorin glycosaminoglycans in fibril to fibril force transfer in relative mature tendons—a computational study from molecular to microstructural level**

M.-M. Giraud-Guille, L. Besseau and R. Martin 1571 **Liquid crystalline assemblies of collagen in bone and in vitro systems**

1581 **Announcements**

**Volume 36 Number 11**

T. Sera, H. Fujioka, H. Yokota, A. Makinouchi, R. Himeno, R.C. Schroter and K. Tanishita 1587 **Three-dimensional visualization and morphometry of small airways from microfocal X-ray computed tomography**

J.D. Humphrey and E. Wilson 1595 **A potential role of smooth muscle tone in early hypertension: a theoretical study**

L. Cristofolini, A.S. Teutonico, L. Monti, A. Cappello and A. Toni 1603 **Comparative in vitro study on the long term performance of cemented hip stems: validation of a protocol to discriminate between "good" and "bad" designs**

H.S. Gill and J.J. O'Connor 1617 **Heelstrike and the pathomechanics of osteoarthrosis: a simulation study**

H.S. Gill and J.J. O'Connor 1625 **Heelstrike and the pathomechanics of osteoarthrosis: a pilot gait study**

B. Weisse, M. Zahner, W. Weber and W. Rieger 1633 **Improvement of the reliability of ceramic hip joint implants**

N. Hagemeister and J.A. de Guise 1641 **In vitro evaluation of combined graft deformation in anterior cruciate ligament reconstructions**

D. Bozkaya and S. Müftü 1649 **Mechanics of the tapered interference fit in dental implants**

B.J. Fregly, Y. Bei and M.E. Sylvester 1659 **Experimental evaluation of an elastic foundation model to predict contact pressures in knee replacements**

G. Whan, J. Phillips, S. Bullock, R.J. Runciman, S. Pearce and M. Hurtig 1669 **Development and testing of a modular strain measurement clip**

A. Nagano and T. Komura 1675 **Longer moment arm results in smaller joint moment development, power and work outputs in fast motions**

S.P. Kotha and N. Guzelsu 1683 **Tensile damage and its effects on cortical bone**

A. Pedrocchi, A. Pedotti, G. Baroni, J. Massion and G. Ferrigno 1691 **Inverse dynamic investigation of voluntary trunk movements in weightlessness: a new microgravity-specific strategy**

L.L. Menegaldo, A. de Toledo Fleury and H.I. Weber 1701 **Biomechanical modeling and optimal control of human posture**

E.A. Hansen, H.-D. Lee, K. Barrett and W. Herzog 1713 **The shape of the force–elbow angle relationship for maximal voluntary contractions and sub-maximal electrically induced contractions in human elbow flexors**

O. Calonius and V. Saikko 1719 **Force track analysis of contemporary hip simulators**

*Short communications*

C.G. Stephanis, D.E. Mourmouras and D.G. Tsagadopoulos 1727 **On the elastic properties of arteries**

J.L. Marín, J. Muñiz, M. Huerta and X. Trujillo 1733 **Folding–unfolding of FN-III domains in tenascin: an elastically coupled two-state system**

T.R. Bush and P.E. Gutowski 1739 **An approach for hip joint center calculation for use in seated postures**

V.M. Zatsiorsky, F. Gao and M.L. Latash 1745 **Finger force vectors in multi-finger prehension**

*Erratum*

A. Rachev and S.E. Greenwald 1751 **Erratum to "residual strains in conduit arteries" [Journal of Biomechanics 36 (2003) 661–670]**

**Volume 36 Number 12**

X. Liu, X. Wang and G.L. Niebur 1753 **Effects of damage on the orthotropic material symmetry of bovine tibial trabecular bone**

J.M. Wakeling, A.-M. Liphardt and B.M. Nigg 1761 **Muscle activity reduces soft-tissue resonance at heel-strike during walking**

A. Ratnovsky, U. Zaretsky, R.J. Shiner and D. Elad 1771 **Integrated approach for in vivo evaluation of respiratory muscles mechanics**

S. Park, R. Krishnan, S.B. Nicoll and G.A. Ateshian 1785 **Cartilage interstitial fluid load support in unconfined compression**

C.A. Yucesoy, B.H.F.J.M. Koopman, G.C. Baan, H.J. Grootenboer and P.A. Huijing 1797 **Effects of inter- and extramuscular myofascial force transmission on adjacent synergistic muscles: assessment by experiments and finite-element modeling**

A. Arndt 1813 **Correction for sensor creep in the evaluation of long-term plantar pressure data**

V. Saikko and O. Calonius 1819 **An improved method of computing the wear factor for total hip prostheses involving the variation of relative motion and contact pressure with location on the bearing surface**

J.H. van Dieën, I. Kingma and J.C.E. van der Bug 1829 **Evidence for a role of antagonistic cocontraction in controlling trunk stiffness during lifting**

J.C. Coleman, R.T. Hart and D.B. Burr 1837 **Reconstructed bone end loads on the canine forelimb during gait**

J.-H. Lin, R.G. Radwin and T.G. Richard 1845 **A single-degree-of-freedom dynamic model predicts the range of human responses to impulsive forces produced by power hand tools**

C.T. Hung, E.G. Lima, R.L. Mauck, E. Taki, M.A. LeRoux, H.H. Lu, R.G. Stark, X.E. Guo and G.A. Ateshian 1853 **Anatomically shaped osteochondral constructs for articular cartilage repair**

Z.M. Maldonado, J. Seebeck, M.O.W. Heller, D. Brandt, P. Hepp, H. Lill and G.N. Duda 1865 **Straining of the intact and fractured proximal humerus under physiological-like loading**

R.S. Ochia, A.F. Tencer and R.P. Ching 1875 **Effect of loading rate on endplate and vertebral body strength in human lumbar vertebrae**

J.-J. Chiu, C.-N. Chen, P.-L. Lee, C.T. Yang, H.S. Chuang, S. Chien and S. Usami 1883 **Analysis of the effect of disturbed flow on monocytic adhesion to endothelial cells**

R. Oosterom, J.L. Herder, F.C.T. van der Helm, W. Święszkowski and H.E.N. Bersee 1897 **Translational stiffness of the replaced shoulder joint**

*Short communications*

D.R. Wilson, M.V. Apreleva, M.J. Eichler and F.R. Harrold 1909 **Accuracy and repeatability of a pressure measurement system in the patellofemoral joint**

T.R. Jenkyn, R.L. Ehman and K.-N. An 1917 **Noninvasive muscle tension measurement using the novel technique of magnetic resonance elastography (MRE)**

1923 **Announcement**
